Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Withdrawal from Issue

As per the letter from Director Richard Bertsch mailed 7-9-2004 prosecution is reopened.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tremaglio et al.(U.S.Pat.6,689,142) in view of Geiger et al.(U.S.Pat.6,249,713).Both Tremaglio and Geiger disclose surgical needle systems that have markers on the needle element to guide and direct the needles in a 3D environments. Note that Tremaglio in Fig. 25 shows marker 252 and Geiger col. 2 lines 16-26 specific reference is made to the use of markers to place them accurately in a 3D environment. Since needles are used in biopsy procedures, one of ordinary skill in the art would find it obvious to use the needle placements systems of either Tremaglio or Geiger to alter a part of a living body to prepare it for a connection to an element for the purpose of determining the compatibility of the element with the living body.

Allowable Subject Matter

Claims 13-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
